## SERVICES

Training ▪ Consulting ▪ Presentation

Global expertise

## Staying one step ahead

APIS Informationstechnologien GmbH is your expert partner for intelligent solutions in FMEA, Risk Analysis and Functional Safety. Following the market launch of the high-performance and user-friendly APIS IQ-Software in 1992, our company has quickly become the leading producer for the global FMEA sector.

At the same time, we are also available as a highly qualified service provider for our many national and international customers. With our experienced staff from the fields of development, sales and consulting, we can provide the most comprehensive support for the use of our IQ-Software. Our services range from one-to-one consulting and team training sessions to the presentation of customer projects.

The APIS service team:  
trainers, presenters and consultants

- Optimal application of FMEA
- Professional presentation
- Effective work with the IQ-Software
- Communicative and clear documentation
- 100% dedication
- Monitoring of learning success with certificates

## Training sessions

We have been supporting our customers with informative and performance-boosting seminars and workshops since 1992. Over 2,500 training events lasting several days each, with over 20,000 satisfied participants are testament to our success.

Our events will tell you everything you need to know about the methods involved and you will learn the various moderation techniques for creating an FMEA. At the same time, we prepare you for optimized software application and the professional presentation of the FMEA. We also show how the results of your FMEA can be combined with methods such as Control Plan, DRBFM or Functional Safety.

In addition, you can also make the most of direct dialogue with the developers of the world's leading FMEA software. This means you can learn how to use APIS IQ in the most efficient way, right from the horse's mouth! We are also happy to direct your requests, comments and requirements to our development department and thus give you the opportunity to help shape future versions of the IQ-Software.

After one of our seminars, the APIS certificate proves your expertise.

We boost the efficiency of our seminars and workshops with the use of communicative and clear documentation, posters and learning modules in the IQ-Software. The high personal involvement and dedication of our employees to each and every one of our customers is the key to the high quality of our seminars.

After successfully completing the test to monitor what you have learnt during the training session, you have the option of obtaining a certificate as an APIS IQ CERTIFIED EXPERT or as an APIS IQ CERTIFIED PROFESSIONAL in order to further underline your expertise in the field. Alternatively, you can opt for receiving a certificate of participation.

## Moderation

Are you lacking the expertise or time for facilitating an FMEA? Would you prefer to spend your time dealing with other tasks? Then make the most of our many years of experience in presentations for hundreds of projects for various products and processes. We would be pleased to take on the presentation and organization of your FMEA and lead your team of specialists to the best results they can achieve! Of course we're more than happy to help you present the FMEA once it has been set up.

## Consulting

On the basis of our many years of experience and expertise in safety and risk management, we are more than pleased to provide our services in all matters concerning technical and methodological questions with regards to FMEA.

**Do you plan to introduce FMEA as a key component of quality management in your company?** Then we'll work with you to create the basis for implementing FMEA in your corporate processes and projects.

**Have you already got some experience with FMEA and IQ-Software but keep encountering difficulties?** We can offer tailored, flexible support in order to solve your problems with methods and answer your software questions.

**Or do you aim to expand or improve the presentation abilities of your staff?** Then take advantage of one of our presentations as "on-the-job training". We can also initiate the presentation of your FMEA and give you the basics and guidelines you need to work independently.

- APIS IQ CERTIFIED EXPERT
- APIS IQ CERTIFIED PROFESSIONAL

- Complete moderation and organization of your FMEA
- Presentation of the prepared FMEA

- The basics for implementing the FMEA
- Solving methodical problems
- Answering your software questions
- Presentation as "on-the-job training"

## Variety

Our diverse range of training services enables you to gain the knowledge you need and to expand your expertise in general. You will also obtain basic knowledge about FMEA and the IQ-Software in our seminars FMEA Methodology, Basic Training and "Two-in-one". More specialized knowledge will be communicated in our seminars or workshops, for example Experts, Facilitators or DRBFM Workshops.

## Global presence

We have risen to the challenges of globalization and offer all of our services worldwide not only in German, but also in English and French. This has enabled us to serve our customers in over 30 countries as trainers and moderators.

No matter where you are, we'll find a way of providing you with our services. Of course, our customers are always welcome to come to one of our varied seminars in our cutting-edge training facilities in Braunschweig, Germany.

We regularly present our services in other cities in Germany and abroad in our customers' markets. In addition, we also offer other options in addition to local consulting services. We look forward to hearing from you soon. Please get in touch!
